Connections Order

01. Select the connector

Check the wire specifications (conductor section, cover diameter) and select the proper color of sensor connector. The proper sensor connector may be different by conductor of wire. Cover diameter of applied wire at connector (at translucent part) and AWG number of body backside are marked.

02. Insert the wires

Check the pin numbers and insert the wires into the according holes. Check that the wires are fully inserted to the end of the cover.

03. Crimping

Insert the cover into the body with a jig (press fitting tool, etc). Apply pressure with the jig from the side.

04. Check the cover

Check to make sure that the cover is level with the body and that there is no space between the cover and the body.
