REACH – Declaration

REACH – Registration, Evaluation and Authorization of Chemicals

Since June 1, 2007 the regulation (EG) No. 1907/2006 (REACH-Regulation) is operative and generates a valid legal basis for all members of the European Union.

All products produced and distributed from Murrplastik Systemtechnik GmbH are classified as finished goods in the sense of this regulation. Finished goods are exempt from registration and Murrplastik Systemtechnik GmbH is considered a downstream user within the supply chain.

To protect human health and environment, within our own interest and in order to guarantee highest standards of product safety for our customers, we intensively follow the implementation of REACH on the part of our production facility partners and suppliers.

According to REACH - Article 33 we will inform unrequested and in due time, whenever ingredients contained in our products above the REACH-defined concentration of > 0.1% are classified as substances of very high critical concern by the European Chemical Agency (ECHA). As of today, it is not assumed that this will be the case. However, we point out that there is no legal liability for declarations as long as our delivered products do not contain any of such listed substances.

We assure that we will strictly follow up and align with all updates on REACH requirements, especially expansions to the list of candidates (Candidate List of Substances of Very High Concern for Authorization).

The current list of candidates is available on the ECHA's website:

<http://www.echa.europa.eu/web/guest/candidate-list-table>

Testimony is given and based on our latest state of knowledge and experience. For facts beyond our knowledge and control, we take no warranty and liability.

Best Regards

Your Murrplastik Team

RoHS – Declaration

RoHS – Restriction of the use of certain Hazardous Substances

This is an EU Directive 2011/65/EU that regulates the use of certain hazardous substances in electrical and electronic equipment.

The regulation 2011/65/EU was put in national legislation on January 2, 2013 and compensated the regulation 2002/95/EG effective from January 3, 2013. The new edition of RoHS covers identical substances and limit values. Among some other things, only the scope will be changed gradually. In addition, compliance with the RoHS Directive is a prerequisite for affixing the CE mark to the equipment concerned.

The Delegated Directive (EU) 2015/863 added four further substances to the list on June 4, 2015. The ten substances in all are as follows:

Lead (0.1 %)

Mercury (0.1 %)

Cadmium (0.01 %)

Hexavalent chromium (0.1 %)

Polybrominated biphenyls (PBB) (0.1 %)

Polybrominated diphenyl ethers (PBDE) (0.1 %)

Bis(2-ethylhexyl) phthalate (DEHP) (0.1 %)

Butyl benzyl phthalate (BBP) (0.1 %)

Dibutyl phthalate (DBP) (0.1 %)

Diisobutylphthalat (DIBP) (0,1 %)

Legislation is aiming for reduction of detrimental effects for humans and environment as well as for improvements in possibilities for recycling.

All products produced and distributed by Murrplastik Systemtechnik GmbH are compliant in terms of this regulation, if they are declared as RoHS-compliant.

Freundliche Grüße

Ihr Murrplastik Team
