

KSD-D Detectable label plate (Polypropylene)

PRODUCT INFORMATION

High-quality detectable label to attach with detectable cable ties directly onto the cables.

KSD label applications

The KSD label is a product designed for the subsequent marking of cables; it features a low-profile. The low-profile design requires that cable ties must not be tightened with a force higher than (50-60 N / 5-6 kg). Since

the force intensifies considerably at the tongues for these small cable diameters, you must observe the recommended areas of application.

The material Polypropylene (PP) is intended only for labels created with the MP laser system.

SPECIFICATIONS

	Polypropylene (PP)
	-30 – 90 °C
	HB
	Detectable labels and cable ties
	Single-line and multi-line labelling

MATERIAL PROPERTIES

Material
Polypropylene (PP)

THERMAL PROPERTIES

Temperature / temperature range
-30 – 90 °C

FIRE PROPERTIES

Fire classification
HB

TECHNICAL INFORMATION

Halogen-free

GENERAL TECHNICAL DATA

Detectable labels and cable ties

Single-line and multi-line labelling

ASSEMBLY METHOD

Cable tie system with plate

KSD-D Detectable label plate (Polypropylene)

LABELLING TECHNOLOGY

Laser devices

Single wire, cable and conduit labelling

All details given in our sales brochures and catalogues, as well as the information available online, are based on our current knowledge of the products described.
