

Milling cutter

Product information

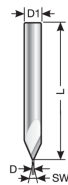

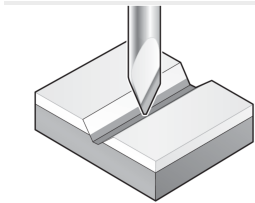

Engraving cutters are conical tools with a cutting edge. The recently incorporated chip groove (spiral shaped) is able to remove chips very well. This will clear the engraving and leave it without burrs and clean. This tool has proved itself to be a veritable all-rounder!

- Specialty cutter for acrylic glass engravings
- For plastic, aluminum, non-ferrous metals, ...

Engraving systems

The milling cutter can be used in conjunction with the MGS series CAM engraving system and the engraving option.

Information, conformities and approvals

Article	Order No.	Color stop ring	D Ø mm	D1 Ø mm	L mm	Cutting angle °	PU pcs.
Milling cutter 30° d = 0.5mm	86721474	Yellow	0.5	3	40	30	1
Milling cutter 60° d = 0.2 mm	86721470	Orange	0.2	3	40	60	1
Milling cutter 60° d = 0.5 mm	86721472	Orange	0.5	3	40	60	1
