

## ALM Rectangular without radius

### Product information

- Triple-layer material (aluminum-plastic-aluminum)
- Black plastic inner layer
- Outer layer in silver or gold
- Available with self-adhesive foil / adhesive foil
- Thickness: 1.5 mm
- Inscription technique: Engraving

ALUMATT products are high pressure decorative laminated sheets, preferably in plain colors. In contrast to standard laminates, Alumatt has a three-layer symmetrical structure of melamine resin impregnated cellulose sheeting. The color of all layers is exactly defined. The colors of both outer layers are usually in stark contrast to the core color. This color contrast makes the engraving very readable. For engraving, the outer layers are kept very thin. The layer thickness is approximately 0.08 mm. The plain papers are homogeneously colored in the mass. The color connection is secured with these paper qualities. The base is free of heavy metals and has a high level of light stability.

1) Other sizes available on request

### Material properties

Alumatt (ALM) II

### Adhesive properties

467SK adhesive film with adhesive

### Thermal properties

Temperature / temperature range -40 °C – 80 °C

### Fire properties

Fire classification B2

### Classification

ETIM 9: EC001288 || eClass 14: 27144009 || UNSPSC: 39131504 ||

### General technical data

Assembly method 00000001 Label glued into place 00000

### Assembly method

Adhesive system

### Labelling technology

Engraving
